Rose collection

Timber-alternative sash windows

# Heritage Rose

# The Heritage Rose

**Tradition is the watchword of Heritage Rose**

Second only to Ultimate Rose in terms of timber authenticity, Heritage Rose is a classically styled sash window that delivers the convenience and all-round excellence of modern uPVC.

Heritage Rose uses the same slim, putty-line profiles as Ultimate Rose, but with a wider 44mm midrail and welded joints. It also features optional flat run through horns, a deep bottom rail as standard and traditional chamfered astragal bars.

And while Ultimate Rose is indistinguishable from timber even from close up, the period detailing and profiles on Heritage Rose mean that from the pavement no-one will know that it isn't an original timber window.

Heritage Rose has been used in conservation areas across the UK, including the Royal Borough of Kensington and Chelsea, Cambridge, Lincoln, Snowdonia and the Lake District. Like every window in the Rose Collection it offers truly modern performance, keeping your home warm, quiet and secure.

Flat run through horn

Mitre-welded corners

Deep bottom rail

Putty line chamfers

44mm midrail with flat interlock

Acorn furniture

Heritage astragal bars

# The Heritage Rose
